

OCSMRM NIH Grant Writing Q/A Session

7-9pm, April 24, Monday

Hawaii Convention Center Room 306AB

Getting an NIH grant is a critical milestone to become an established investigator in USA, and similar grant requirement exists in other parts of the world. Many members in OCSMRM are superb scientists deserving to be funded by NIH. OCSMRM would like to demystify NIH grant pursuit process and make it efficient and effective, particularly to help junior members including assistant professors and postdocs to develop their careers. Thanks to a group of our senior established investigators who are very successful with NIH funding and very experienced with NIH review process, OCSMRM has organized and would like to invite you to a grant writing Q/A session 4/24 Monday 7-9 pm at ISMRM Hawaii Convention Center Room 306AB.

The session aims to be interactive between audience who have grant questions and the panelists who will address these grant questions. We will start with an introduction/overview, which will be provided by Professor Hanzhang Lu's 10 min presentation entitled "Top 10 things to know about writing an NIH grant". Then we will proceed to questions and answers.

To enhance the productivity of this session, we would like to collect questions from you. You can ask any questions about NIH grant process. It would be most helpful to you if you ask questions that concern you, such as those in your summary statements. Of course, you need redact private/sensitive information from your questions. We are open to collect questions now (submit to Professor Yi Wang, yw233@cornell.edu). You should submit questions as soon as possible to get optimal considerations by our premier panelists. We encourage you ask questions at the session.

Ed X. Wu, PhD

OCSMRM President

Lam Woo Professor and Chair of Biomedical Engineering

The University of Hong Kong

&

Yi Wang, PhD

OCSMRM NIH Grant Writing Q/A Session Chair

Distinguished Professor of Radiology

Cornell University

3/30/2016 Update

We are pleased to update you that by now we have 14 confirmed distinguished panelists, who are experienced and keen in helping OCSMRM scientists develop their careers and secure grants.

We have 10 distinguished panelists from US who are highly successive with NIH grants and very active in reviewing grants at NIH study sections, including a NIH program officer (PO):

Cheng Leo
Ge Yulin
Lu Hanzhang
Lu Zheng-Rong
Liu Guoying (NIBIB PO)
Shih Yen-Yu
Song Allen
Su Lydia
Ying Leslie
Yuan Chun.

We are also going to expand grantsmanship to China, for which we have the following 4 distinguished panelists who are most active radiology chairs, institute director and corporate R&D director:

Chen Qun
Du Yiping
Li Kuncheng
Zhang Minming

In addition to questions during the session, you can submit in advance your questions to Professor Yi Wang, yw233@cornell.edu, who will help to get optimal considerations by our premier panelists.
